Professional Summary

AI Developer building production LLM agents, cloud-based business workflows, and full-stack applications. Experience with Claude and OpenAI, business API integrations, and Python services on Google Cloud. Migrated and secured a live SaaS application, with earlier experience in enterprise application support and secure self-service systems.

Technical Skills

AI and Automation:

- Claude, OpenAI, LLM Agents, Vision Models
- AI-Assisted Development: Claude Code (Multi-Agent), Codex

Backend and Data:

- Python, Flask, FastAPI, ASP.NET
- PostgreSQL, Firestore, Cloud SQL, SQL Server

Frontend:

- Next.js, React, TypeScript, Angular
- HTML, CSS, Bootstrap

Cloud and DevOps:

- Google Cloud Run, Cloud Build, Secret Manager
- Azure AD, CI/CD

Integrations:

- Microsoft Graph, Zoho, QuickBooks
- Stripe, Meta, LinkedIn APIs

Testing and Tools:

- pytest, Automated Testing, Application Security
- Git, GitHub, Azure DevOps

Experience

AI and Automation Engineer - ProCalcs | Mar 2026 - Oct 2026

- Built production AI agents, automation pipelines, and full-stack applications for a US-based virtual HVAC design firm
- Integrated email, CRM, estimate, and payment workflows through Microsoft Graph, Zoho, QuickBooks, and Stripe
- Developed an hourly Zoho CRM-Google Sheets pipeline on Cloud Run Jobs with 209 automated tests, CI secret scanning, and deployment of the exact container image produced by the build

Associate Software Engineer - Accenture - Ebloc 2, IT Park, Cebu (Hybrid) | Aug 2024 - Feb 2026

- Supported 15+ enterprise applications across multiple sites in compliance-driven environments
- Built SAM, a self-service platform using .NET and Angular for password resets and account recovery, with Azure AD SSO and role-based access control
- Scripted recurring tasks; coordinated app upgrades, database migrations, and service/database account rotations with infrastructure, DBA, and security teams

Web Developer Intern - Above Digital - Australia (Remote) | Jan 2024 - Jun 2024

- Developed WordPress sites from Figma designs and responsive components with React, HTML, CSS, and Bootstrap
- Integrated headless WordPress with React via REST APIs using Git-based workflows

Project Highlights

After-Hours AI Email Agent - ProCalcs | 2026

- Built an email agent using Python, Flask, and Claude to triage messages and send or draft threaded replies through Microsoft Graph
- Added Zoho CRM context, phishing checks, escalation based on email risk, and a Firestore-backed control panel with audit logs; deployed as an always-on service on Cloud Run

HVAC Estimate Pipeline - ProCalcs | 2026

- Built a Claude vision pipeline that turns emailed HVAC construction plans into draft QuickBooks estimates
- Reduced analysis time from about 11 minutes to 3-4 minutes with parallel vision processing; validated generated estimates against actual HVAC quotes and built a standalone estimate API on Cloud Run

SongProIQ - ProCalcs | 2026

- Migrated a live AI-powered songwriting feedback application from Flutter to Next.js, with a Flask and PostgreSQL backend
- Shipped 18 security fixes covering secrets, Stripe webhook verification, authentication, and rate limits
- Improved audio analysis using librosa and fixed a race condition in credit accounting using database row locks

AI Lead Quiz - ProCalcs | 2026

- Built a lead-generation quiz using Next.js and FastAPI, with Claude-generated results, PDF reports, and CRM lead capture
- Refactored a 1,054-line backend into modules covered by 179 tests

Education

BS in Information Technology - Cebu Technological University - Ginatilan Extension Campus
- Graduated: 2024
